PROJECTS

KGSOMANI/Gyanshetra (EDUCATION) In this project we use laravel framework and we use PHP ,HTML,Bootstra for handling the data we use Hadoop (Try it here)

Portfolio-website. Building with the help of the React-js library and all the web development tech , also use MDB (Try it here)

Net-flix(React). My idea was to make everything static (movies, series, tv shows, ...) but then I use TMDB API which you can pull most popular movies, top rated shows, what's trending, collections, lists and much more. Really worth checking the effort made.
